

HARDI 364 PUMP

Optimized liquid flow, improved diaphragms and remote greasing increase the life of the pump and facilitate ease of service

HARDI 364 PUMP

The driver and heart of every HARDI product is the pump. To meet the requirements of bigger sprayers and to improve lifetime, we have redesigned the HARDI pump.

The most visible change is the new covers designed to protect the pump from mud and water getting into the system.

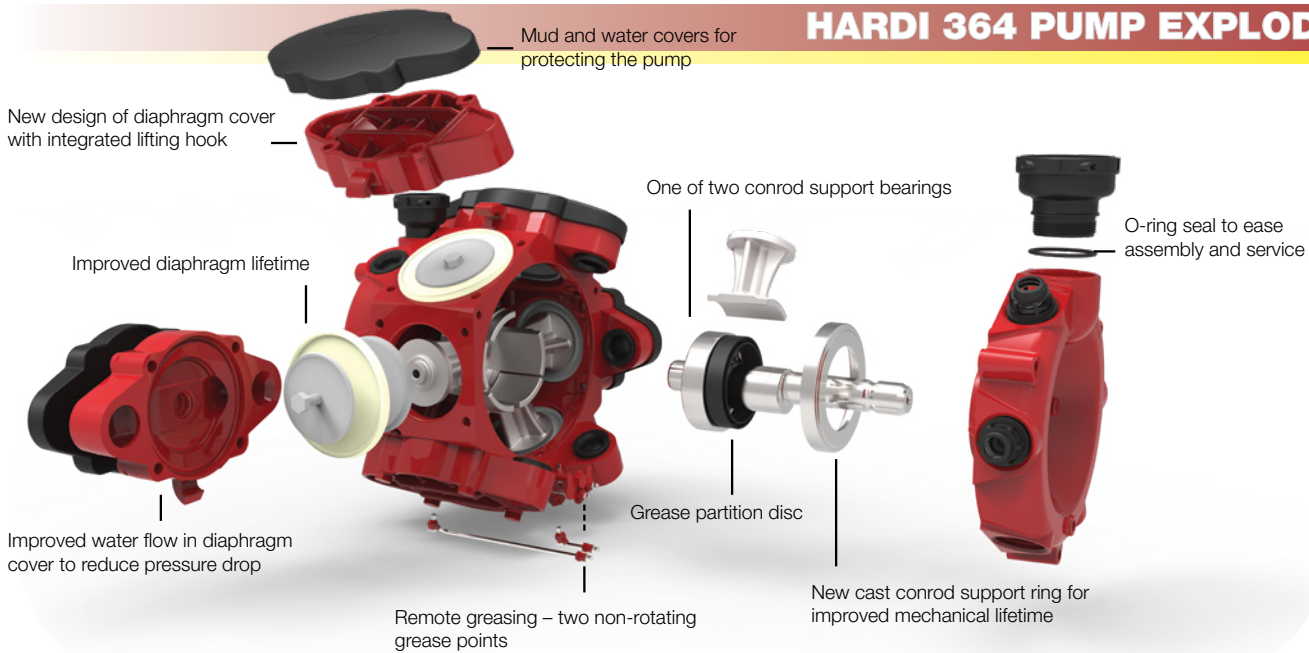

To facilitate ease of service, we have added integrated hooks to the diaphragm tops and have improved the lifetime of our diaphragms.

Greasing has never been easier through the two non-rotating greasing points on the front side of the pump, allowing greasing of both the front and the rear main bearings of the pump.

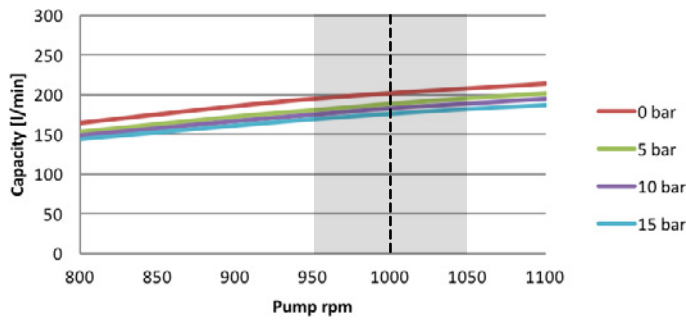

To reduce pressure drops in the system, we have improved the water flow in the diaphragm tops. The casted conrod support ring has also been redesigned for improved mechanical life time.

- ▶ High capacity six diaphragms positive displacement radial pump
- ▶ Optimized water flow
- ▶ Improved diaphragms
- ▶ Two non-rotating remote greasing points
- ▶ New design of diaphragm top locks with integrated lifting hooks
- ▶ Mud and water covers for protecting the pump heads
- ▶ Cast connecting rod support ring for improved mechanical lifetime
- ▶ Self-priming and able to run dry
- ▶ Can rotate clockwise and counter clockwise
- ▶ Dry sump to simplify maintenance
- ▶ No special tools required for servicing
- ▶ Cast iron crankcase and covers
- ▶ 2" suction port, 1 1/4" pressure port
- ▶ Hydraulic drive kit available
- ▶ 540 rpm - 51gal/min - 0 psi
- ▶ 540 rpm - 47gal/min - max 220 psi

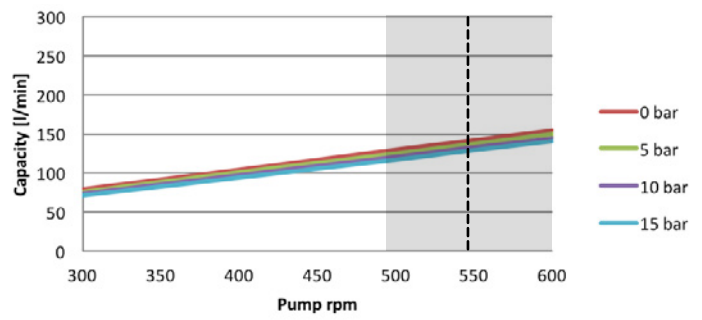

HARDI 364 PUMP EXPLODED VIEW

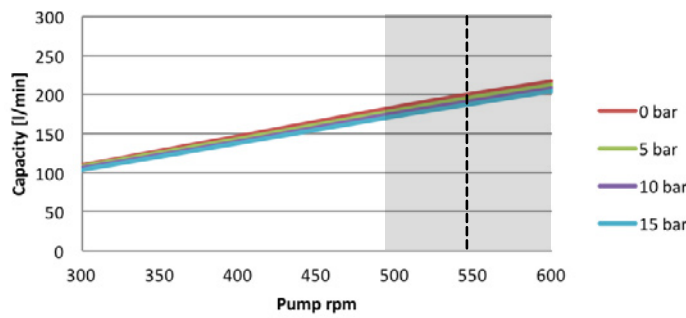

Pump type 5.5 with 1000 rpm

Pump type 7 with 540 rpm

Pump type 10 with 540 rpm

Recommended work RPM
